

PT DATA KARYA TEKNOLOGI

Technology solutions that put people first

IT SERVICES

The “Internet of Things,” or IoT, could be a tremendous boon for information technology companies now and into the future. IoT refers to the network of physical object equipped with the electronics, connectivity and software that enables them to exchange data and adapt accordingly.

OVERVIEW

Service provided

- Software Services
- Security Services
 - Endpoint Management Services
 - Antivirus
- Data Services
 - Database and Data Server hosting
 - Database Management and Administration
 - Database Monitoring and Alerts
 - Database Tuning and Performance
 - Data Architecture Strategy

Software Services

We provide complete design and development offerings for projects requiring an alternative approach to off-the-shelf or out-of-the-box software. Our comprehensive approach provides continuous services and the ability to scale easily - saving time, money and lowering your risk compared to staffing alone. Using proven methodologies and best practices, we deliver end-to-end solutions from initial strategy and design to development, testing and deployment, all while being expertly managed throughout the engagement. We use a strategic, risk-based approach to software development, focusing on problem solving and operational excellence.

Security Services

Endpoint Management Services

Your precious IT resources and budget shouldn't be held hostage to manual software management tasks, multiple point solutions that leave critical gaps, or overly complex and expensive software suites. Our easy-to-use, fast-to-implement appliances provide comprehensive endpoint systems management. Capabilities include streamlined OS provisioning, automated network discovery of software and hardware inventory, asset management, endpoint security and patching, application software distribution and maintenance, and a fully integrated service desk. And you can manage virtually all network-connected devices, including Windows®, Mac®, Linux® and UNIX® machines, Chromebooks, and network-connected non-computing devices.
